Passage Opening _____

TECHNICAL SHEET

System components:

- 3 wooden spacers for squareness
- 1 accessories kit

Magnetic lock with traditional keyhole

Gasket foam anti-distortion

Hinges adjustable on 3 axis with pre-mounted insert on the frame and cover to hide screws

Set up:

The system comes ready for fitting a plasterboard structure, already set for sitting the frame in. It is mandatory to keep the system squared and fix it with appropriate tolerance in order to avoid vertical pressure, following accurately the technical instruction provided; after the system is set and plumb, put 12,5 mm plasterboard sheets on each side, using only the screws 3,9x19 provided. Once the system is installed, put plaster and level the flush with the wall side, using the net that protects against possible cracking of plasterwork, and plaster the internal side.

Swing doors:

wooden

Mdf with pine tree frame door 42mm thick for pull version, 50mm thick for push version.
